

Cutter Stacker

Enhance your label production

The GoDEX cutter stacker is a powerful tool to enhance your label production, specifically in textile applications. After the labels have been printed and cut, the stacker will pile them up for easy and orderly collection. The integrated heavy duty cutter has an adjustable cut line and a life cycle of over 1 million cuts with most materials up to 325g/m² before sharpening. The blades can be sharpened up to 4 times! Originally designed for textile application this cutter stacker can handle materials ranging from satin care labels to thick cardboard hang tags. Various integrated solutions avoid issues with static electricity. The CS1000 Cutter Stacker requires virtually no maintenance and comes with three years warranty on non-wearing parts. Mounting it is uncomplicated and it is easy adjustable to label sizes up to 100mm wide. The cutter-stacker will automatically pause the printer when full. All mechanical parts are easy accessible for servicing. In spite of its uncompromising quality the CS1000 remains very affordable and combined with a ZX series printer it is definitely the best value print-cut-stack solution on the market today.
